PROFILE

Before talking about qualifications and professional abilities, I would like to introduce myself. Taking web development as a profession not only fulfills my pocket but also my heart because it has been my passion since my early teenage.

I'm an open-minded web developer who's ready for new challenges. I have spent most of my career in web development.

I am currently working on becoming a JavaScript full-stack developer.

I believe that people should do things which they are good at or in which their hearts lays. That's why I chose web development as my career because I believe I'm good at this and I am always honest and I am never afraid of doing hard work.
